

ER/Studio® 8.0 MetaWizard Import/Export Bridges

[ER/Studio Home](#) | [ER/Studio Documentation](#) | [Embarcadero Technical Support](#) | www.embarcadero.com

The tables below list applications supported for model data import and export. Many applications use a directory or ODBC data source rather than a single file such as a *.xml or *.dm1 file for metadata exchange. Please refer to the description within the wizard for your particular platform. You can also view the MIRModelBridges.xml file directly in a text editor or any xml viewer.
